

Austin | New Orleans | Albuquerque

Protexus was founded by two veteran Location Managers with more than 40 years of combined experience in the motion picture industry. The health and well-being of crew and cast is something we take personally.

Our protocols are based on discussions with an Epidemiological Consultant, guidelines issued by the U.S. Centers for Disease Control & Prevention (the "CDC"), the Occupational Safety & Health Administration ("OSHA"), the proposed recommendations from the Alliance of Motion Picture & Television Producers ("AMPTP") Industry-Wide Labor Management Safety Committee Task Force & "The Safe Way Forward," a joint report of the DGA, SAG-AFTRA, IATSE, & Teamsters' Committees for COVID-19 Safety Guidelines.

Protexus is not a cleaning company attempting to adapt to the new realities of a pandemic. ***We are a specialized virus remediation service built from the ground up with one goal: helping production resume in the safest way possible.***

Our electrostatic spraying technology & disinfecting agents are the most effective, efficient, safest, highest-quality tools currently available for use against the novel coronavirus.

### What we offer:

- Daily disinfecting of stages, sets, production offices, & catering spaces
- Disinfecting of vans, work trucks, star trailers, honeywagons, & mobile restroom units
- Disinfecting of new locations prior to the arrival of any prep crews
- Disinfecting of cast & crew housing prior to arrival or on an ongoing basis
- Other client-tailored services
