

A turnkey solution to COVID-19 Compliance in Film & TV

pipe  med

With on-site diagnostic testing as our cornerstone, PiperMed is a presence on your set, offering our medical expertise to protect your cast and crew from infectious disease threats. Our comprehensive approach begins with on-site testing, continues with protocol tailored to each department, includes live, virtual training for comprehension of compliance implementation and medical professionals to round out your Health Safety Department.

TESTING

- On-site testing for entire cast and crew - a game changer for set safety, not to mention schedule.
- Rapid results for all tests to ensure no on-set spread.
- Our medical advisors oversee testing schedule creation, considering Zone A and Zone B.

PROTOCOL

- Use our SAG-approved protocol, successfully implemented on set beginning July 2020.
- Our experienced producers adapt protocol to your production, department by department, day by day.
- Our medical advisors and risk assessors oversee this protocol design.

TRAINING

- Our medical professionals, with HIPAA and OSHA training, are available to serve as your COVID Compliance Officer/Health Safety
- We interface with your producer and AD team, as well as Health Safety Department to implement sanitation and cleaning schedule.
- We host live webinar for all your department heads to learn protocol, get their questions answered before reporting to set Day 1.
