ABOUT US

HippoMed Wellness clinics is a Medical Group out of Dallas, TX that offers a variety of medical services from Chiropractic care, to Family Medicine and General Wellness. Over the last two years HippoMed Wellness Clinics has placed an emphasis on addressing the COVID-19 crisis by opening testing sites in various communities across the US, most of which are in Texas.

In the case of COVID-19, we have developed an application that manages everything we do in regards to COVID-19. This includes Patient Intake, Patient Flow Management, Results Management and Delivery and a host of reporting features that allows us to monitor our efficiency in real time on all fronts. This means that we are able to carry the ball from end zone to end zone without dropping it when providing solutions like this to groups like yours. We provide you with the reporting dashboard that allows for real time status checks on all patients and their tests.

All of the labs we work with have a direct integration between their Lab Information System (LIS) and our application. This allows for smooth, HIPPA compliant data transactions that improve efficiency and speed. Results are typically back from the lab and delivered to the patient within 48 hours.

We have managed many large testing contracts in the past, some of which require testing north of 3,000 patients in 36 hours, so high volume does not pose an issue for our company.
