## PROFILE

A professionally trained script supervisor working locally in Texas.

My SCRIPT SUPERVISING service is a strategic system of ongoing story analysis, identifying continuity elements, creating schedules/reports and empowering productions to pivot when required. My system clearly aligns dept. heads and supports filmmakers, producers and editors to confidently shape narrative through tracked continuity, clear shot reports and dialogue (including improv) tracking.

My 25-year career has been shaped by the extraordinary power of storytelling. I have enthusiastically pursued this through script coverage, magazine editing, brand marketing, fundraising/development, board leadership, serving as a spokesperson and launching nonprofits. I look forward to helping you bring your project to life.
