

# GynnFX

## A small, scrappy VFX Studio offering Visual Effects for film, video and broadcast

Showreel available at [GynnFX.com](http://GynnFX.com)

### **Offering film, video and broadcast production services**

We work with your team on your production from start to finish. Shot-by-shot, we will be there for you. The key to a good production is to plan, plan, plan – and work your plan.

- Pre- and post-production services. Production planning, Motion Graphics, Compositing and 3D Asset Creation, Previs and Postvis.
- On-set VFX direction for productions of all sizes: on-set, we work with your production team, directing the visual effect creation and the needed components for post-production.
- Once the shoot is finished, we use our expertise to create the look you want with the VFX assets that work for you.
- GynnFX works in a variety of color spaces, including Red and ACES, to give you the widest possible color management options for your project.

### **Motion Graphics**

We create high-end motion graphics and composites. We have some great ideas on how to help you with your project. These services include:

- Create or repurpose titles, motion graphics.
- Motion graphics for pre-production, production, and post-production -- from concept to finished product.
- We work with your production team on the desired effect(s) and how to best achieve such effect(s).
- We color correct and grade your footage, if needed, per the project's look and feel.
- We maintain close communication with your project manager and team to anticipate needs and facilitate timely solutions.

### **Composites**

We use our expertise to provide previs, on-site composites to give you a taste of what we will fine-tune once the shoot is done and we begin the final composite.

### **3D Asset Creation Services**

We create and animate high-end 3D assets as needed. Services include:

- Modeling, texturing, lighting, rendering, and compositing high-resolution assets to use in your production.
- Creating animations and effects.
- From scratch or add detail and resolution to already existing assets.
- We can use and modify off-the-shelf assets as needed.
- 3D logo creation. Working from pre-existing 2D or 3D logo, or from scratch, we define, create, model, texture, light, render and composite your final logo. Great for film, video and broadcast.

### **Motion Capture**

We use state of the art motion capture tools to create the animated look that works for your project(s).

### **Match Move**

Turn your shoot into a spatially accurate 3D landscape in which all post-production additions come to life.

### **Tools**

We use the latest tools and techniques to bring your ideas to life. **GynnFX** has wide experience using:

- Autodesk Maya
- ZBrush
- Syntheyes
- Marvelous Designer
- Character Creator
- DaVinci Resolve
- Nuke
- Adobe Substance products
- Adobe After Effects, Premiere, Illustrator and Photoshop
- Unreal Engine

**Chicago – Texas – Boston – New York  
DC – London - Ireland**
