Sound

Sennheiser MKH-416

Resource Usage

- **Consumables**
Gaffers tape, Gels
- **Battery/Power**
Charging Stations
- **Film Stock/Tape**
N/A (Digital)
- **Miscellaneous**
Cables, Tripods, C-Stands

Notes

Equipment checked and maintained regularly.

POWER & AIR

Generators:

- Low Noise Operation
- Diesel/Fuel Efficient
- Portable for any set
- On-Site Tech Available

Heating & A/C

- Climate Control
- Heating & A/C
- Portable
- Tent or Structure Ready

Description of Power & Air

- **Easy Installation:** Designed for quick setup with flexible ducting and minimal tools required, ideal for tents, event spaces, or emergency shelters.
- **Compact and Portable:** Often equipped with wheels or handles, making them easy to move and position as needed.
- **Energy Efficient:** Modern units are designed to consume less energy while maintaining effective temperature control.
- **Durable Construction:** Built to withstand outdoor conditions, including rugged environments and frequent transportation.
- **Quiet Operation:** Equipped with sound-dampening features to ensure low noise levels, making them suitable for outdoor sets & event use.
- **Safety Features:** Includes automatic shut-off mechanisms, overheat protection, and flame-resistant materials for secure operation in any setting.
- **Versatile Power Options:** Can run on various power sources including electricity, propane, or diesel, depending on the model.
- **Wide Area Coverage:** Capable of heating or cooling large spaces, making them suitable for everything from small tents to large temporary shelters.
- **24-Hour Onsite Technician Support:** Many units come with the option for around-the-clock onsite technician support to ensure continuous and reliable operation.

Outdoor Lighting

- **High-Intensity Lighting:** Provides powerful, bright illumination suitable for night filming or low-light environments.
- **Weather-Resistant Design:** Built to withstand outdoor conditions such as rain, wind, and dust, ensuring reliable performance in any location.
- **Portable and Adjustable:** Easily transported and set up, with adjustable height and angle options for precise lighting control.
- **Crane-Mounted for Height:** Lighting can be mounted on cranes to achieve elevated positions, illuminating large areas or hard-to-reach spots.
- **Safety Features:** Includes heat dissipation systems, shock resistance, and stable bases to ensure safe operation on film sets.

Outdoor lights for movie sets or filming are essential for creating the perfect lighting in any location, day or night. These lights offer high-intensity illumination, ensuring that even in low-light conditions, the filming area is well-lit for optimal camera capture. Built to be durable and weather-resistant, they can handle challenging outdoor environments. Their portable and adjustable designs allow for quick setup and versatile positioning, with options to mount the lights on cranes for added height and broader coverage. Energy-efficient lighting solutions help reduce power costs, while safety features ensure secure operation throughout the filming process. Whether it's a small set or a large outdoor location, these lights are perfect for all filming needs.
