

Epic Creative Co-Op:

Vehicle-capable soundstage, 4-acre private wooded backlot, multiple indoor studios and integrated post-production offices.

The Epic Creative Co-Op is a versatile 4-acre creative campus in the Spring/Woodlands area, specifically designed to serve filmmakers, commercial videographers, and professional photographers. Our facility offers a blend of high-ceiling indoor studios and a diverse outdoor backlot, providing a controlled environment for both small-scale content creation and large-scale productions.

Indoor Studio Facilities:

The Epic Mancave (Studio 1): A 40' x 24' climate-controlled production space featuring 16' ceilings and rustic paneled walls. This studio is equipped with large double-door access (vehicle-capable), curtain walls for acoustic management, and professional lighting grids: multiple backgrounds and private dressing/makeup room, full kitchen, and ADA bathroom.

Silver Rock Production Studios: The region's largest professional production suite, ideal for high-end commercial work, featuring a dedicated podcast studio and extensive post-production capabilities. Cycloramic wall, movable ceiling grid for lights, kitchen, bathrooms, green room and video edit suites available.

Specialized Photo Studios: Several additional indoor studio spaces tailored for product photography, portraiture, and podcasting. Fully equipped with professional lighting/grip gear and sound equipment.

Outdoor Backlot & Sets:

Our 4-acre campus serves as a versatile backlot with multiple "looks" in one location:

Natural Terrain: Lush open fields, tree-lined trails, and wooded areas suitable for a variety of genres, from romantic exteriors to suspense/horror sequences. Complete privacy - no neighbors - no sound restrictions. Drive directly to the backlot for easy loading/unloading.

Custom Sets: Purpose-built outdoor sets designed for lifestyle and commercial photography.

Crew Support Infrastructure: A large summer kitchen and covered picnic area (seating for 24) serves as an ideal hub for craft services, central staging, makeup, and script reviews.

Key Features for Productions:

Vehicle Access: Large studio doors allow for vehicles to be driven directly onto the soundstage.

Climate Control: All indoor studios are fully HVAC-equipped for year-round production comfort.

Privacy & Control: Unlike public parks, our private campus offers a secure, uninterrupted environment for talent and crew.

Gear Availability: On-site access to professional lighting, modifiers, and grip equipment.

Parking for 100+ vehicles

Location:

701 Sawdust Road, Spring, TX 77380 (The Woodlands Area)
